Dr. Claudia Pagliari

Life and health

Sensitive data

sexual hist

residence

RF (genetics)

social + economic circumstances

employment prospects

likelihood of causing nuisance
person

→ Vested interests

→ intermediaries taking info → digital profiles that can be monetized

Google =

⊕ Regulation
benefit to others
right to withdraw

⊖ Corporations

Some individuals pay for privacy vs. others that sell their data
↑ inequality

→ promise of Anonymization
"Data Server Linkage" data mining linkage

⊙ Log uses → pharmaceutical research — as a byproduct and development

Core. data → public expectations was damaged

↓
Sold data
to industry

In pandemics, data was used:

- 1) identify areas not socially distancing
- 2) Scan X-ray
- 3) development vaccine → genetic vulnerabilities in the virus
- 4) Web-based 'symptoms' checker → ↓ loads on healthcare
- 5) in overloaded hospitals → AI decided who had the best chance of survival
- 6) traced contacts
- 7) facial recognition → guess people if not quarantining

Tracking app need between 60-80% of a country smartphone users

↓
They need to trust ← Safety
Benefits

Singapore TraceTogether app

10% initially

20% after Gov strongly encouraged it

Lessons

- 1) if you don't have { public cooperation } tech is not enough
trust in Gov agencies
 - 2) ethical shortcomings such as { tolerating inequality } are ↑ risk
marginalization } than tech shortcoming
inequality
- in Singapore 2nd wave began in migrant workers area → as not duly tested

Protre → swift social analysis
 address → moral
 political
 organisational weakness | system

Genetic Testing

Case → 23andMe
 Golden State killer

Neonatal Genetic Screening bill grade test

Longgang in Melbourne 2000s

Longgang had a private "part" but not
selling health data

the media made a story

Parents mistrust → neonates didn't have testing

Anna Lindh → 2003 — Swedish potential harm
 foreign
 minister → assassinated

→ GeneWatch UK

→ Human Genetics Commission's guidelines for genetic testing → NOT
 (HGC) binding

↓
 disbanded in 2010 by Gov → not yet
 replaced

Positive → swift social analysis
 address → moral
 political
 organisational weaknesses | system

Robots

- Paro → assistant for people w/ dementia

Chatbot → Babylon → mobile app
NHS

Issues - exaggerated claims of DA skills
- mismatch between → when company
seeks regulation approvals, it says
it's low risk trial and then
self promotes as Diagnostic AI

~~the~~

Datafication of work

⇒ Case in Malawi → tech into workflow allowed
to detect illicit practices

⇒ BitGive → gloriating bitcoin → tracking sources of
donations

Social scientists → surveillance

→ Frank Pasquale

→ Kathy O'Neill
